

CATALOGO TRANSPONDER & KRC

Que es un transponder?

El transponder es un circuito electrónico dotado de una antena y de una memoria en la que se escribe un código, el cual se puede leer o reescribir sin necesidad de un contacto mecánico o eléctrico.

Además del sector automovilístico, los transponders se utilizan en diferentes aplicaciones como: Control de accesos, Logística, Identificación de Animales, Trazabilidad de productos, etc..

En el caso específico de automoción el transponder es el dispositivo para la identificación o aceptación de una llave (1), por el sistema inmovilizador (2) del vehículo, mediante señales de radio frecuencia, no usa ni baterías ni pilas internas, se alimenta directamente desde la antena que hay en el clausor (3) o contacto del vehículo

TRANSPONDERS

* 1 transponder para
proceso sniff
* 1 transponder for
the 'sniff' process

* El chip TPX8+
sustituye al
modelo TPX8+
* The TPX8+ chip
replaces the
TPX8+ model
